"Auxillary COM Port" determines the communication with a Micro-processor relay. If the relay does not have any communication option, then skip this step.

Click on [Drop Down Menu] button and select the COM port of the laptop to which the relay is connected.

Establishing communication between AVTS and a Micro-Processor Relay

The left pane shows a tree view of devices:

- Devices:
 - ABB
 - ABB Circuit Shield
 - Alstom
 - AREVA
 - Arteche
 - BASLER
 - BECKWITH
 - CUTLER-HAMMER
 - END TO END
 - ERL Phase
 - GE
 - GE MULTILIN
