Safety

Symbols on the instrument

Caution, refer to accompanying documents.

Protect

Protective conductor terminal.

WEEE, Waste Electrical and Electronic Equipment. Please utilize your local WEEE collection facilities in the disposition of this product and otherwise observe all applicable requirements.

Safety instructions

Always keep the equipment connected to protective earth (ground), when any input lead is connected.

High voltage on input terminals

Always use safety connecting leads

IMPORTANT

Do not use liquid detergents or aerosols when cleaning TM200. Use a damp cloth.

Operating instructions

Use the following setup to start and stop the timer. When activating with:

A. Applying voltage

B. Removing voltage

C. Closing contact

D. Open contact

Any combination of start and stop can be selected. The reset button sets the time to zero, and enables a new start.

Example

If you want to measure the operation time for a 24 V DC contactor with 110 V DC over a closing contact under load.

- **1]** Connect the TM200 to protective ground (earth).
- **2**] Set the buttons to start as A, "Applying voltage".
- **3**] Connect the start leads across the contactor coil (regardless of polarity).
- **4]** Set the stop buttons as A, "Applying voltage".
- **5]** Connect the stop leads across the load (regardless of polarity). If it is desired to measure directly at the contact, set the stop buttons as B, "Removing voltage".

5

Specifications TM200

Specifications are valid at nominal input voltage and an ambient temperature of +25°C, (77°F). Specifications are subject to change without notice.

Environment

Application field

The instrument is intended for use in medium-voltage substations and industrial environments. Altitude <2000 m (6500 ft) above sea level.

Operating Storage & transport Humidity

CE-marking

Temperature

LVD EMC

General

Power supply 5 V DC via separate adapter

Megger is a leading global manufacturer and supplier of test and measurement instruments used within the electric power, building wiring and telecommunication industries.

With research, engineering and manufacturing facilities in the USA, UK, Germany and Sweden, combined with sales and technical support in most countries, Megger is uniquely placed to meet the needs of its customers worldwide.

Megger is certified according to ISO 9001 and 14001. Megger is a registered trademark.
