

RELEASE NOTE

SVERKER 900 Update 2.17

26th September 2022

SVERKER 900 software update 2.17

The software release version 2.17 (2.17.8298.21990 SVN Rev:7493) will add a self-calibration applied in factory for Current Generators MkII and also fix a bug for Current Generators made before MkII where I1 sometimes made a delayed turn off at 500 ms, when receiving the trip on binary inputs.

Upgrade to SVERKER 900 v 2.17

The software release version 2.17 (2.17.8298.21990 SVN Rev:7493) are activated for all models:

Basic, Standard and Expert.

- We recommended upgrading all SVERKER 900.
- Note, that this version 2.17 contains improvements that are important for all models.
- To upgrade you just need to unzip the zip file and copy the unzipped content on the root of a clean USB-stick. Connect the USB-stick to SVERKER then power it up and just follow the upgrade process from chapter 3.9 in manual.
