

How to change scrollbar width on TM1700 running on Windows XP Professional

1. Check if Windows Steady State is installed and activated

- a. Press Ctrl+Alt+Del to start the task manager and select the Applications tab
- b. Press New Task and then the Browse button
- c. Browse to C:\Program Files and check if there is a folder named “Windows Steady State”

- d. If the folder “Windows Steady State” exists, please jump to section 2 below
- e. If the folder “Windows Steady State” is not found, Windows Steady State is not installed on the unit. Please click Cancel in two dialogues and then close the Task Manager. After this you can proceed directly to section 3 below.

How to change scrollbar width on TM1700 running on Windows XP Professional
